Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 17 November 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

An examination of this application reveals that applicant is unfamiliar with patent prosecution procedure. While an inventor may prosecute the application, lack of skill in this field usually acts as a liability in affording the maximum protection for the invention disclosed. Applicant is advised to secure the services of a registered patent attorney or agent to prosecute the application, since the value of a patent is largely dependent upon skilled preparation and prosecution. The Office cannot aid in selecting an attorney or agent.

Applicant is advised of the availability of the publication "Attorneys and Agents Registered to Practice Before the U.S. Patent and Trademark Office." This publication is for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Claims 1-5 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-5 are rejected under 35 U.S.C. 102(b) as being anticipated by
Lupkas (5,691,855).

Lupkas (5,691,855) shows (see fig. 1):

- a) a device 22 utilizing a reversed application of the of the split-image range-finder concept tailored for use in quickly and accurately reporting the relative distance of another vehicle or an obstacle visible in a vehicle rear-view mirror, as claimed in claim 1,
- b) the device 22 is adjustable by the vehicle operator manually, as claimed in claim 3,
- c) the device 22 makes use of two divergent lines of sight, approximately horizontal determined by the setting of a primary rear-view mirror, and a second line of sight determined by the setting of the add-on mirror attached to the lower edge of the primary mirror and adjusted to reflect an image of a specific point selected by the user to the rear of the vehicle as claimed in claim 4,
- d) the combined existing 18 and add-on mirrors 22 above provide two views to the rear showing the object vehicle in the primary mirror, and , by the presence or absence of that image in the add-on mirror 22, precisely reporting the position of the vehicle or obstruction relative to the selected point in the rear, as claimed in claim 5.

Claim Rejections - 35 USC § 103

Art Unit: 2872

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lupkas (5,691,855) in view of Edelman (5,005,962).

As set forth above, Lupkas (5,691,855) discloses the invention substantially as claimed except for plastic material for the mirror..

Edelman (5,005,962) shows the use of plastic material for the mirror, see col. 3, lines 46-51 because of less expensive.

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use plastic material for the mirror as disclosed by Edelman (5,005,962) in the device of Lupkas (5,691,855) to achieve the device as

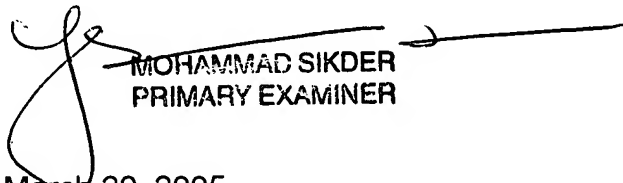

Art Unit: 2872

claimed, because the use of such plastic material for the mirror is cheaper than glass material.
